HAND DELIVERY

Honorable Paul Mattila
Shelby County Trustee
P.O. Box 2751
Memphis, TN 38101-2751

Dear Mr. Mattila:

The Mayor has asked that I respond to your request for space at the Disaster Recovery facility at 6470 Haley Road. We will be pleased to make space available for the rack, network equipment and servers. I don't think there will be any problem allocating one or two work stations, but I need to get the existing space plan to confirm this. I should be able to do this within the next couple of days.

With regard to your cabling requirements from 160 North Main, I strongly encourage you to connect to the Shelby County Extranet, in lieu of incurring the costs associated with the installation and operation of a privately leased data circuit. This connection would be made with existing fiber already in place within the 160 North Main building and allow you to connect over the existing broadband links between 160 and the remote site.

This Extranet connection would also allow you access to a wealth of applications and services, including access to the County financial system (AMS) and the MLGW customer information system. Further, you could do away with your existing private T-1 data circuit to MLGW, resulting in further savings.

The Information Technology Department is willing to work with you and your staff to insure a secure connection, utilizing the existing data links and employing encryption or other security measures acceptable to your office. This system has proven itself to be successful with several of our law enforcement and other local offices.

Honorable Paul Mattila

Mr. Pachis will be your contact for this project. If there is anything further that I can do to facilitate this, please do not hesitate to give me a call. Thank you.

Sincerely,

James F. Huntzicker
CAO and Director,
Division of Administration and Finance
